Leroy Takudzwanashe Chindove

Data & BI Developer · Python · SQL · Power BI

Harare, Zimbabwe | chindoveleroy@gmail.com | github.com/chindoveleroy00 | chindoveleroy.github.io

PROFILE

Data Science diploma holder with hands-on experience in IT support, data work and web administration. I build practical data products: forecasting systems, prediction models and dashboards, using Python, SQL, Power BI and Apache Superset. I am moving toward BI development and data engineering, and I like projects built on real business data.

SKILLS

Programming	Python (Flask, Django, FastAPI), SQL
BI & Visualization	Power BI, Apache Superset, Streamlit
Machine learning	XGBoost, Scikit-learn, ARIMA, Prophet, feature engineering
Databases	MySQL, SQL querying and data cleaning
Web	WordPress administration (plugins, themes, content), Flask web apps
IT support	Hardware and software troubleshooting, device diagnostics
Business	Sales, customer service, social media marketing and paid ad campaigns

EXPERIENCE

IT Support & Data Officer

Zimbabwe Open University (ZOU)

- Provided IT support to staff and handled data-related tasks alongside it.
- Served as webmaster: helped rebuild and manage the university website on WordPress.
- Handled content updates, site maintenance, and plugin and theme management.

Sales & Customer Service

OutsourceSpot Zimbabwe

- Handled customer enquiries and sales conversations.

Founder, Mobile Device & IT Equipment Resale

Independent business, Harare

- Source, assess and resell secondhand phones and IT equipment.
- Diagnose devices using IMEI checkers, 3uTools and AccuBattery: battery health, carrier and MDM locks, eSIM/SIM compatibility, and grey-market or mislabelled units.
- Run the business's Facebook, Instagram and TikTok presence: product content, customer enquiries, pricing, and paid ad campaigns with audience targeting, budgeting and performance tracking.

PROJECTS

SIFS – Sales Inventory Forecasting System

Python · FastAPI · Streamlit · ARIMA · Prophet

- Demand forecasting using ARIMA, Prophet, Croston TSB and an ensemble model.
- Automated data cleaning and validation pipeline, with reorder recommendations.
- Zimbabwe-specific price control compliance checks, JWT role-based access and a RESTful API.

StockFlow Analytics

Python · Flask

- Analytics app built on real data from my own resale business.

Patient Health Recovery Prediction System

XGBoost · Flask · MySQL · Chitungwiza Central Hospital context

- Predicts recovery duration from vitals, treatment and admission data.

- Supports single and batch (CSV) predictions.

Heart Disease Prediction System
XGBoost · Scikit-learn · Flask · Parirenyatwa Group of Hospitals context

- Feature engineering including age deciles, cholesterol ratio, BMI categories, interaction terms and PCA.
- Web interface built with Flask and WTForms.

EDUCATION & CERTIFICATIONS

Diploma in Data Science
TelOne Centre for Learning

SQL for Analyst Bootcamp Certificate
DevTown / Microsoft Student Chapter, July 2025

PL-300 Power BI Data Analyst
In progress

Secondary Education
8 'O' Level passes · 'A' Level Business Studies (C), Pure Mathematics (D)

ADDITIONAL

Languages	English, Shona. Learning German toward B2.
License	Class 4 driver's license
